

OUR AUGUSTA, MAINE FACILITY IS POWERED BY WIND!

NorthCenter has signed a contract to buy 100% of our electricity from wind power.

HOW DOES THIS WORK?

Energy retailers sell renewable energy credits known as REC's. National organizations, such as Green-e, verifies that the wind power is available and guarantees that our purchased energy credits are truly derived from wind power.

how RECs work

electricity + RECs = green power

..... RECs
 Flow of Electricity

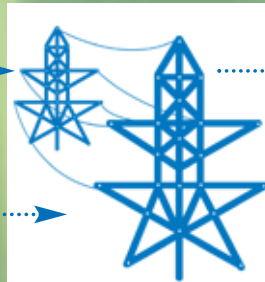

Conventional Energy Generators

Renewable Energy Generators

Green Businesses

WHAT ARE RECs?
 Renewable Energy Credits
 or Certificates are
 a unit of measure

1 REC = 1,000 kilowatt-hours
 of electricity that enters the grid
